

The Quality of your Medical Facility's
Air Should Match the Quality of
your Medical Facility's Care

MEDICAL FACILITIES

When your medical staff is dealing with issues as delicate as surgical needs, extensive burn and wound treatment, intense allergies, or deficient immune systems, the quality of your facility's air can be a critical factor in your patients' well being and recovery. Patients, staff and visitors should all feel protected from potential bacteria, viruses and allergens in the facility's air as well as unpleasant odors unique to medical environments that can be detrimental to productivity and healing.

The Green Klean® Commercial Air Scrubber filters air three times more effectively than HEPA designs by removing 99.98% of airborne particulates down to 0.1 micron in size.

The Green Klean® Commercial Air Scrubber is a powerful solution for your Medical Facility's supplementary air filtration needs, providing filtration effectiveness that is three times better than standard HEPA designs.

Supplement your Medical Facility's Existing HVAC System

When there is a need to boost the overall filtration and airflow in particular rooms, or supplement the existing HVAC system when down for maintenance or repairs, the Green Klean® Commercial Air Scrubber provides a higher level of filtration than standard HEPA designs. The Green Klean® Commercial Air Scrubber takes in air at the bottom (360°), and releases purified air at the top (360°).

Clears the Air of Hundreds of Gases and Odors

The Green Klean® Commercial Air Scrubber targets over 350 gases and odors, leaving behind fresh, clean air for everyone in your facility to breathe.

Targets Unhealthy Particulates

The Green Klean® Commercial Air Scrubber provides powerful reduction of many airborne particles, including allergens, some viruses & bacteria and mold spores. It captures these pollutants and keeps them from spreading to unaffected areas.

Three Times Better than HEPA Designs

Many harmful particles including bacteria, viruses, smoke and more, are smaller than 0.3 microns. The Green Klean® Commercial Air Scrubber can remove 99.98% of particles down to 0.1 micron – three times better than ordinary HEPA filters.

Customized to Target your Key Needs

The Green Klean® Commercial Air Scrubber can be customized with the ideal filter for the job – from general air cleaning and mild odor removal to the reduction of more moderate to heavy gases and odors, aldehydes and more.

- Chemicals/ Disinfectants
- Cafeteria Food
- Fecal Matter
- Urine
- Sick Room
- Vomit/Bile
- Bacteria
- Fungus
- Mold
- GI Bleeds
- Tube Feeds
- Vascular Wounds
- Burning Hair/Flesh

Benefits of the Green Klean® Commercial Air Scrubber

- Provides a healthier environment with happier patients and employees
- Removes 99.98% of particles down to 0.1 micron – three times better than ordinary HEPA designs
- Quickly reduces many unpleasant gases and particles, including allergens, mold spores, some viruses & bacteria and odors
- Designed to work continuously – 24 hours a day, 7 days a week, so patients and employees can breathe easier and feel healthier

Air changes per hour:
Low: 2 per hour
Medium: 4 per hour
High: 8 per hour
