

## The Brand New CK LW 13/1 Roam!

A highly portable unit that is redefining effective, convenient cleaning for an entire industry

### Roam Free With No Cords

In any commercial setting, cleaning spaces quickly and efficiently is a necessity to ensure quality and increase your bottom line. When it comes to vacuuming, there are many ways to do it, but almost all forms of vacuuming require you to switch outlets when you run out of power cord. With the brand new CK LW 13/1 Roam, you will never run out of power cord because the machine is battery operated! In addition to being battery operated, you won't lose out on any suction power, allowing you to clean your spaces uninterrupted with the same (or better) results as your current machine!

### Clean Any Space Any Time of Day

With the CK LW 13/1 Roam, you have the ability to clean anywhere anytime. With a dB rating below 70, the Roam is extremely quiet and you can be free to vacuum any space, including noise sensitive facilities such as schools, hospitals, retail stores and more! In addition, the 13" cleaning path along with cordless operation allows this machine to fit in hard to reach places, giving you the ability to clean hard-to-reach places with ease! Cleaning under something? The CK LW 13/1 Roam also includes an LED light and can pivot down to the ground allowing you to reach under surfaces and see what you are cleaning!

### Minimal Downtime, Maximum Cleaning

One of the biggest problems that battery units have to be able to overcome is running out of juice before the job is done. In addition, long charge times can plague any staff's productivity if the job is not done in one pass. With the CK LW 13/1 Roam, you won't have to worry about either problem. The 44V Lithium Ion battery provides users with a run time of up to 50 minutes, which is plenty of time to clean a facility that is not fully carpeted or isn't that large. After you finish cleaning, plug the charger into the machine and in just under two hours, your battery will be fully charged! However, thanks to having an interchangeable battery, you don't have to wait before cleaning. Simply swap out the drained battery with a fully charged one, and you can instantly start cleaning the rest of your space!

### Easy Portability

The "LW" in CK LW 13/1 Roam stands for lightweight, which is an understatement for this unit. Even with the battery in the unit, this machine only weighs 11 pounds, allowing anyone to be able to lift this unit into their storage place if need be. If this machine needs to be transported between job sites, it can be placed in any vehicle with minimal effort. With no cords to deal with either, you don't have to worry about tangling or damaging them and not being able to use your vacuum.

# Tornado's CK LW 13/1 Roam Delivering Leading Edge Innovation, Durability, and Versatility

## Features and Benefits of the CK LW 13/1 Roam

- Perfect for commercial buildings, hotels, schools, retail shops, and hospitals
- Battery operation provides up to 50 minutes of run time
- 13" cleaning path
